

movidrum

DRUM MOVER

IDEAL TO PUSH, PULL AND TURN DRUMS, REELS AND SPOOLS

Renova's Movidrum is a motorless drum mover that helps the operator to reduce efforts when the need of push, pull or turn paper, plastic or wire reels or spools arises weighing up to 650 kg.

Compact and easy to operate, Movidrum reel movers can operate near production lines or in narrow spaces where forklifts cannot reach.

It is a safety measure that eliminates possible injuries caused by manual pushing, in accordance with the technical standard ISO 11228 "Ergonomics – Manual handling" part 2 "Pushing and pulling".

ANTI-SLIP HAND-GRIP

soft silicon rubber handle

ERGONOMIC DESIGN

the light steel design helps the operator to move reels even in long and non-straight paths

CUSTOMIZABLE

tailored projects according to the bore diameter of rolls.

HIGHER SAFETY LEVEL

reduces any strains and injuries due to the manual handling of the loads

VISUAL IDENTIFIER

Personalized model identifier available upon request
