introduction

Dear Customer,

Thank you for purchasing Renova's **movicart** – battery cart movers.

We also thank you for the preference you have reserved for this innovative product. We are certain it will satisfy you with its technologically advanced solutions, its in-line and elegant design and its professional quality.

In this manual you will find our instructions for a proper use of this product and the necessary technical information, as well as our advices, to ensure excellent performance over time.

All information contained in this manual have been collected respecting the rules in force, the current state of knowledge of design and construction, our knowledge and our many years of experience.

The instruction manual was translated with all due care and attention. However, we do not accept liability for any translation errors. The Italian version of this instruction manual is definitive.

The warranty does not apply in cases which occur as a result of the Customer's violation of advice concerning operation, incorrect use, improper application, negligence (including but not limited to improper maintenance and storage), accidents, improper installation, modifications (included but not limited to the use of non-original parts or accessories not authorized by Renova), improper adjustment or repair. All parts subject to normal wear are excluded from the guarantee.

warning

CAREFULLY READ THE INSTRUCTIONS AND WARNINGS IN THIS MANUAL AND KEEP THEM FOR FURTHER REFERENCE FOR ENTIRE PRODUCT LIFE. THEY SUPPLY IMPORTANT INSTRUCTIONS REGARDING OPERATIONS AND SAFETY FOR INSTALLING, USING AND MAINTAINING THE PRODUCT.

PLEASE TAKE THE TIME TO READ AND UNDERSTAND THE INSTRUCTIONS COMPLETELY BEFORE THE INSTALLATION AND USE OF THIS PRODUCT.

IN THE EVENT OF A POSSIBLE BREAKDOWN OF THE PRODUCT, THE OPERATOR SHOULD UNDERSTAND THE MANUFACTURER'S INSTRUCTIONS AND BE AWARE OF THE DANGERS, BEFORE ANY CHECK INTERVENTION OR RECOURSE OF RENOVA'S TECHNICAL ASSISTANCE.

general warnings

- **movicart** is exclusively designed to move cart movers on wheels (2 fixed and 2 pivoting).
- **movicart** must not be used to brake heavy loads which run toward the appliance.
- The workplace must be kept proper of whatever object should be between the machine and the object to move.
- The operator must always be aware that nothing or no one is in the way of the object to be displaced and that no one could be endangered by the moving object.
- Certain fundamental rules must be respected when using any kind of electrical appliance. More specifically:
 - do not leave the appliance exposed to the weather (rain, sun, etc.)
 - do not use the appliance next to flammable material
 - do not let children or incapable persons use the appliance without supervision
- A hearing protection must always be used.

assistance

general instructions

INITIAL CONTENT OF THE BOX

A	movicart	x1
B	batteries	x2 (optional)
C	battery charger	x1
D	shipment kit	x1

CONTENT DESCRIPTION

MOVICART – in the model as ordered, MCE400 or MCE400E.

BATTERIES - **movicart** (all models) is provided with a second battery (optional). The two batteries Plug & Play are housed in the box near the **movicart** system and are ready to be used (battery < 30%).

BATTERY CHARGER - **movicart** is provided with the original battery charger.

SHIPMENT KIT – composed of battery connector.

PACKAGING

Please do not throw away the wood packaging of your **movicart** system as it might be useful for storage purposes, when moving or, in case of damages, when the device must be sent back to Renova srl.

SERIAL NUMBER

Each **movicart** is provided with its serial number.

The serial number is stamped on the side plate of the movicart, above the rear wheel.

Example in the picture on the right.

Please find the serial number also on the warranty sheet provided with the **movicart**.

IMPORTANT:

Always communicate the serial number when requiring assistance or spare parts for your **movicart**.

Instructions for use

- Unpack the appliance and store the packaging material
- After unpacking, make sure that the appliance is intact with no visible signs of damage caused by transport. If in doubt, do not use the appliance and contact Renova srl
- Place the **movicart** on a safe and flat surface that can support its weight
- Assemble the handle by connecting the electric cables with those of the **movicart** previously.
- Insert the battery into the special chassis. Previous recharge of the battery is not necessary
- Push the switch into the ON position
- At this point **movicart** can be used.
- Push the switch into OFF position when the **movicart** is not running in order to preserve the battery charge
- The standby function has been added: after 2 minutes of inactivity, it causes the red diagnosis LED to flash and puts the MCE400/MCE400E into sleep mode. To reactivate it and use it again, simply press the throttle lever, both in forward and reverse gears. This function ensures that the battery charge lasts much longer, up to a maximum of two times longer than the current duration.
- Two small anti-vibration buffers have been added, which secure the battery in its working position, eliminating the slight movement that currently exists when the MCE400/MCE400E is used on less than perfectly smooth floors. This accessory is also available for earlier-year MCE400/MCE400E models.

PLEASE NOTE:

Battery-powered **movicart** is equipped with reverse gear to allow you to drag the cart.

BATTERY STATUS

The status LEDs (see the picture at page 8):

GREEN LED	charged battery
YELLOW LED	50% battery charge (when active)
RED LED	discharged battery

ATTENTION!

Use the **movicart** only when GREEN and YELLOW LEDs. Do not use the **movicart** with RED battery status LED to avoid any irreparable damage to the electronic unit and the battery. With RED battery status LED recharging the battery is mandatory.

BATTERY RECHARGE

- Push the switch into the OFF position.
- Remove the battery from the chassis (as in the picture)
- Insert the battery into the charger.
A green LED now lights up.
Insert the battery into the charger. A red LED on the battery charger now turns on.
- The estimated time of charging is about 4 hours (maximum time needed for a full recharge of the battery). The battery is full recharged when the LED will turn green.
- Please leave the battery under charge for about 30 minutes to stabilize the tension of the cells.
- After recharging the battery remove the battery from the charger, then unplug the charger from the mains supply. The red LED of the charger will remain lit for a bit of time even if cable unplugged.

ATTENTION!

For the full recharge of the battery, please use the battery charger supplied with **movicart**. To not damage the battery please do not use different battery chargers.

BATTERY HANDLING PRECAUTIONS

- Do not disassemble, crush or puncture a battery
- Do not dispose of a battery in fire
- Do not immerse the unit in any liquid
- Do not expose a battery to temperatures above 40°C (104°F) and below 5°C (41°F)
- Do not use a damaged battery
- Do not leave batteries unused for extended periods of time, either in the product or in storage

BATTERY STORAGE AND DISPOSAL

- Store the batteries separately from the product
- Store the batteries at temperatures between 15°C and 20°C (59°F and 68°F)
- Always check and follow your applicable regulations before disposing of a battery

malfunctions diagnosis

In case of anomaly or not functioning of the **movicart** system, please count the number of flashes of the diagnosis LED to identify the problem and solve it using the schedule below:

NUMBER OF FLASHES	DIAGNOSIS	SOLUTIONS/REMEDIES
1	Motor already powered at start (forward gear)	Turn off/on with throttle in zero position
2	Motor already powered at start (backward gear)	Turn off/on with throttle in zero position
3	Battery tension too low	Charge the battery
4	Battery tension too high	Use another battery and contact Renova
5	Throttle not at position zero at start	Turn off/on with throttle in zero position
6	Broken throttle (potentiometer)	Replace the throttle
7	Overheating	Cool the electronic board
8	Programming error eprom	Turn off/on. If the problem persists, contact Renova
9	Error on control's power	Turn off/on. If the problem persists, contact Renova

ATTENTION!

If, by pressing the UP button, the lifter plate does not rise, press the DOWN button and drop the lifter plate down to the lowest point. Later, press the UP button again to raise the lifter plate.

PLEASE NOTE:

Please see warranty conditions on the warranty sheet.

SPARE PARTS REQUEST

Please always communicate the serial number of your **movicart** when requiring spare parts together with the code of the spare parts needed.

Each **movicart** is provided with its serial number.
Please find the serial number of your **movicart** stamped on the **movicart** frame, above the rear wheel.
Example in the picture on the right.

Please find the serial number also on the warranty sheet provided with the **movicart** and on the Declaration of Conformity in this manual

control panel

1	Power ON/OFF
2	Power on red LED and diagnosis function. If it lights up intermittently, count the flashes and read the corresponding anomaly to page 8.
3	Battery charge status indicator
4	Control button for raising the lifter plate
5	Control button for lowering the lifter plate
6	Butterfly throttle Pushing the top of the lever, the Movicart moves forward (forward gear) Pushing the bottom of the lever, the Movicart moves backward (reverse gear)
7	Emergency stop belly button with anti-crushing safety function for the operator
8	Potentiometer that fixes the maximum speed of the engine (the speed is then adjusted by the operator with the throttle as in point 6)
9	Acoustic horn button

optionals and accessories

The wide range of available options for **movicart** allows it to be used with various types of carts, both in terms of tube sizes of the structure to be handled, and height above the ground of the frame itself.

If a hole is available on the structure, **movicart** has, among its options, a pin coupling that allows the movement of different cart types with particular structures that cannot be coupled with the standard options.

The combination of the numerous accessories allows the interfacing with most of the existing carts. However, Renova is always available to solve customer problems by creating customized accessories.

CART GRIPPERS

HANDLE EXTENSION

MCEP0104	Handle extension, 610 mm
----------	--------------------------

To use the handle extension, it is necessary to disassemble the handle and disconnect the cables between the handle and the **movicart**.
After that, connect the extension cables with those of the **movicart** and fix with the 4 screws the extension cable to the **movicart**.
Repeat the operation on the other side of the extension cable, connecting the cables to the handle previously disassembled until obtaining the same configuration as the image above.

instructions for a proper use

Movicart has been designed for handling most of the carts on the market, equipped with two fixed wheels and two pivoting wheels.

The operating conditions require that the floor, on which the carts are moved, must be smooth, free from steps, holes, rails, and all kinds of fixed and non-fixed obstacles that may prevent its free movement.

After having installed the appropriate coupling type to that cart, bring **movicart** to the correct position with the forward/reverse commands. Later, with the UP/DOWN buttons, hook the cart to secure it to the **movicart**, which is now ready to perform its function.

The lifter plate supporting the coupling for the cart must be regulated in height using the UP and DOWN buttons in order to guarantee a sufficient push on the dragging roller to exercise the roller traction and, therefore, the **movicart** movement with the hooked cart.

If pressing the accelerator the hooked cart doesn't move, but the **movicart** slips, just press the UP button a little bit more (without the cart wheels lifting off the ground) until the **movicart** starts to move and drag the cart.

ATTENTION!

Pay attention not to lift the cart wheels that must always be in contact with the ground. Raising the **movicart** lifter until the cart wheels are detached from the ground can cause irreversible damage to the **movicart** itself.

Movicart is equipped with an emergency stop belly button safety system that safeguards the operator, in case he should get trapped between a fixed obstacle (e.g. a wall) and the movicart itself, by blocking the cart movement and reversing its direction instantly.

Movicart is also equipped with an acoustic warning device with push-button control at the Operator's discretion.

The bidirectional wheels of the **movicart** allows it to move in two directions simultaneously during its operation. In this phase the operator must be aware that the translation speed has to be reduced to avoid jamming or overturning of the movicart.

In order to optimise the choice of the most suitable speed for the working phase, **movicart** is equipped with a maximum speed regulator that, in combination with the accelerator, which is controlled by the operator, finds the ideal speed for the handling of that cart type.
